Introduction

Astro Mirror is a tool for professional astrologers.

The methods of the Astrological Psychological Institute (API) also called 'Huber School', which was founded in the 1960s by Bruno and Louse Huber, form the essential basis of the App.

But there are also some other astrological techniques available, and that is:

Calculation of Chiron or Lilith

Show position of fixed stars in the horoscope

Marking the aspect cycles according to Dane Rudhyar

Hint: Tap on the symbol  jumps back to the table of contents

Fundamental

Adjustment of the horoscope graphic using volume buttons:

The dimensions of the devices on which Astro Mirror is used are very different. The position of the horoscope graphic can therefore be easily fine-tuned with the Volume Up / Volume Down buttons.

In the charts of the Basic, Houses and Lunar Node horoscope, the position can be adjusted step by step by pressing these keys (also several times). This shifts the graphic up/down in small increments in portrait format and right/left in landscape format. The position set in this way is automatically saved and retained even after the programme is restarted.

Meaning of the symbols in the upper blue bar:

SYMBOL	
POSITION	Top left
FUNCTION	Open the left menu to select the most important Functions: 'Actual' 'List' 'New' 'Settings' 'Help' 'Extras' 'Quit'
SYMBOL	
POSITION	Top right
FUNCTION	Open the right menu. Here the selection changes depending on the context.
SYMBOL	
POSITION	Top left
FUNCTION	Take one step back. Corresponds to the function of the 'Back' key of the device. Sometimes this symbol is not visible, the 'Back' button still works.

↑ Functions in the left menu:

↑ Actual Horoscope

SYMBOL	
LABELING	Actual
FUNCTION	Calculate and display current horoscope.
DESCRIPTION	<p>The function can be reached in two ways:</p> <ol style="list-style-type: none">1. In the 'Main Menu', which is displayed when you tap on the 'Hamburger' symbol in the upper left corner (three horizontal white Lines on top of each other) or simply by swiping from the left edge inside.2. In the list of all saved horoscopes in the Toolbar at the top .

↑ List of stored horoscopes

SYMBOL	
LABELING	List
FUNCTION	View the list of saved horoscopes. Detailed description of the functions in the list.
DESCRIPTION	<p>In the 'Main Menu', which is displayed when you tap on the 'Hamburger' symbol in the upper left corner (three horizontal white Lines on top of each other) or simply by swiping from the left edge inside.</p>

↑ Enter new data

SYMBOL	
LABELING	New
FUNCTION	Open input mask for a new horoscope.
DESCRIPTION	<p>The function can be achieved in two ways:</p> <ol style="list-style-type: none">1. In the 'Main Menu', which is displayed

	<p>when you tap on the 'Hamburger' symbol in the upper left corner (three horizontal white Lines on top of each other) or simply by swiping from the left edge inside.</p> <p>2. In the list of all saved horoscopes in the Toolbar at the top .</p>
--	--

Extras

The menu item 'Extras' opens further selection options.

SYMBOL	
LABELING	Licensing
FUNCTION	<p>A license key can be entered here to to unlock Astro Mirror as a full version.</p> <p>If the license has already been activated, the status is displayed.</p>
SYMBOL	
LABELING	About
FUNCTION	<p>Displays technical information about Astro Mirror:</p> <p>Version, date of creation, versions of the databases used. Copyright and credits.</p>

Finish the program

SYMBOL	
LABELING	Quit
FUNCTION	Exit Astro Mirror.
DESCRIPTION	<p>A quick way to exit the app without having to press 'Back' many times.</p> <p>If the option under 'Settings' > 'General' > 'Remove from memory' is activated, the app is also removed from the list of recently used apps.</p>

↑ Functions in the Horoscope List:

↑ Enter new data

SYMBOL	
LABELING	New
FUNCTION	Open input mask for a new horoscope.
DESCRIPTION	<p>The function can be achieved in two ways:</p> <ol style="list-style-type: none">1. In the 'Main Menu', which is displayed when you tap on the 'Hamburger' symbol in the upper left corner (three horizontal white Lines on top of each other) or simply by swiping from the left edge inside.2. In the list of all saved horoscopes in the Toolbar at the top .

↑ Edit Data

SYMBOL	
FUNCTION	Change the data of a saved horoscope.
DESCRIPTION	<p>In the list of all saved horoscopes at the top border in the toolbar.</p> <p>Select the desired horoscope in the list by pressing and holding. This causes the line of the selected horoscope to be highlighted. Now the symbol 'pen' can be used to enter the editing mode.</p>

↑ Delete Data

SYMBOL	
FUNCTION	Delete a stored horoscope.
DESCRIPTION	<p>In the list of all saved horoscopes at the top border in the toolbar.</p> <p>Select the desired horoscope in the list by pressing and holding. This causes the line of the selected horoscope to be highlighted.</p>

	<p>If desired, further horoscopes can now be clicked on, which are then also marked for deletion.</p> <p>Marking all horoscopes is also possible: After a chart has been marked, either a symbol with a check mark or with 3 dots on top of each other (depending on the Android version) appears in the upper right corner. By clicking on this symbol, all lines in the list can then be marked.</p> <p>Now all marked horoscopes are deleted at the same time via the symbol 'trash' or the 3 dots symbol after a security query. This deletion cannot be undone !</p>
--	---

Current Horoscope

SYMBOL	
FUNCTION	Calculate and display the current horoscope.
DESCRIPTION	<p>The function can be achieved in two ways:</p> <ol style="list-style-type: none"> 1. In the 'Main Menu', which is displayed when you tap on the 'Hamburger' symbol in the upper left corner (three horizontal white Lines on top of each other) or simply by swiping from the left edge inside. 2. In the list of all saved horoscopes in the Toolbar at the top .

Data Export / Import

SYMBOL	
FUNCTION	Export or import horoscopes.
DESCRIPTION	<p>In the list of all saved horoscopes at the top border in the toolbar.</p> <p>Opens a selection dialog with 3 options:</p> <p><i>Save data as AAF file:</i> Exports the complete list of saved horoscopes in the standardized 'Astrological Exchange Format', which is a standardized text file with the file extension AAF. This file can be read by other astrological programs that do support AAF.</p> <p><i>Read data from AAF file:</i> Imports data from</p>

	<p>an existing AAF file. Here either the complete content of the AAF file can be read in or only certain records.</p> <p><i>Send AAF file to ...:</i> Same as 'Save data to AAF file' but a selection is displayed to forward the AAF file to another application such as an e-mail program. To make this option useful to use a functional email program should be available on the device.</p>
--	--

Filter by category

SYMBOL	
FUNCTION	Filter the list of horoscopes by category.
DESCRIPTION	<p>In the list of all saved horoscopes at the top border in the toolbar.</p> <p>Opens the list of categories. New categories can also be defined here. Categories created by the user are retained even after an update of the app.</p> <p><i>One or more categories can be selected here.</i></p> <p>After leaving the category list (via the back button of the device or via the arrow to the left in the upper left corner), the chart list is displayed filtered according to the selected categories.</p> <p>The icon at the top has changed and now looks like this:</p>  <p>This also visually indicates that filtering is active. Click/tap this icon again to cancel the filtering.</p> <p>The number of records that match the filter criterion is displayed in the heading.</p> <p>If there are no horoscopes assigned to one of the selected categories, the list remains empty.</p> <p><i>When entering new horoscope data,</i> categories can already be assigned in the input mask.</p> <p>To subsequently assign categories to a</p>

	saved chart, go into Edit Mode: To do this, press and hold on the horoscope in the list until a pencil appears at the top. Use this to go to the edit screen and assign categories there. Afterwards, do not forget to tap on 'Save'.
--	---

↑ Sort Data

SYMBOL	
FUNCTION	Set the sorting order of the horoscope list.
DESCRIPTION	<p>In the list of all saved horoscopes at the top border in the toolbar.</p> <p>Opens a selection dialog with the sort options:</p> <p><i>Direction</i> ascending descending</p> <p><i>Field</i> First Name Second Name Date Place Last viewed</p>

↑ Functions under Extras:

↑ Settings

GENERAL
<p>Confirm quit Define if the dialog question 'really quit ?' is shown.</p> <p>Remove from memory If this option is selected, Astro Mirror is not kept in the list of recently launched applications. This option is not activated by default after installing the app.</p> <p>Client list If this option is selected, on start of the app the list of stored horoscopes will be shown, sorted by newest on top.</p> <p>Show Compares If this box is ticked, comparison horoscopes are also displayed in the list of saved</p>

horoscopes. Otherwise, only the birth charts are listed.

Data Export Path (AAF/PDF)

Choose a path in the file system where the generated AAF and PDF files will be stored. If nothing is chosen the standard path is on SD card ../App_BackUp/Astro Mirror.

ACTUAL CHART

Home town

A location can be selected here that will be used when creating a current horoscope if the location determination on the device is not active or is not desired. (See next point)

Place for Here and Now

Here you have two options:

1. Always use home town
2. Use GPS (if possible)

Explanation:

If automatic location detection is desired, the app needs the location permission. This permission is requested on first installation of the app. It **does not have to be** granted, the app also works without this permission, just without automatic location detection. Without this permission the home town is always used for actual horoscopes.

Privacy:

The determined location is used exclusively for the calculation of the current horoscope and in no way transferred or stored outside of the app.

Here and Now

show at program start

If this check box is set, the app calculates the current horoscope immediately after the program start and displays it.

Astro Clock

This selection causes a current horoscope to be updated automatically every minute.

No hibernation at Astro Clock

Enabling this option prevents the display from going into hibernation, i.e. getting dark.

CAUTION: This results in increased battery consumption, this option is only useful if the device is connected to a charger or the app is running on a PC in the emulator.

HOUSES

House System

Here the default house system can be set.

The selected house system is used on creating new horoscopes. In the case of saved horoscopes, the house system can be changed later, whereby this change then only applies to the respective horoscope.

The following house system can be selected:

Alcabitus

Equal (AC = Cusp of house 1)

Campanus

Koch

Placidus
Porphyrius
Regiomontanus
Topozentrisch
Vehlow (equal, AC = Center of house 1)

After new installation the default house system is Koch.
Only with house system Koch the Huber methods can be used. If a different house system is selected the Huber methods are not available.

ASPECTS

Aspect Set

Here you can choose the standard aspect set or delete an aspect set.

In an aspect set all aspect settings are saved. That means, which aspects should be shown separated for graphics and in lists, and the orbs for each combination of planet and aspect.

The number of aspect sets is not limited.

In a horoscope chart tapping on the upper right corner, where the actually used aspect set and the aspect factor is shown, opens a dialog to easily change the aspect set and the factor.

The following aspect sets are pre defined:

Huber

Contains the classic aspects Conjunction, Semi-Sextile, Sextile, Square, Trine, Quinkunx and Opposition for all planets without Chiron and Lilith.

Huber_plus

Contains the classic aspects Conjunction, Semi-Sextile, Sextile, Square, Trine, Quinkunx and Opposition for all Planeten including Chiron and Lilith.

Extended

Contains the classic aspects Conjunction, Semi-Sextile, Sextile, Square, Trine, Quinkunx and Opposition plus the additional aspects Quintil, Biquintil, Semi-Square und Sesquisquare for all planets without Chiron and Lilith.

Extended_plus

Contains the classic aspects Conjunction, Semi-Sextile, Sextile, Square, Trine, Quinkunx and Opposition plus the additional aspects Quintil, Biquintil, Semi-Square und Sesquisquare for all planets including Chiron and Lilith.

Orbs of aspects

Here individual orbs for each combination of planet and aspect can be set. The setting can be done either through a slide control or by typing a number in the orbs column. The maximum value for an orb is limited by 10 degrees.

ATTENTION: All settings made here are only saved permanently when 'Save' or 'Save as ...' is tapped. In this way, for example different orbits for several planets can be set one after the other and then all can be taken over by 'Save'.

At 'Save as ...' you will be asked for the name of the aspect set. If a name is entered here that does not yet exist, a corresponding new aspect set is saved.

Show aspects

Here you can set for each aspect separately by planet and aspect set whether the aspect should be displayed in the chart graphic or in the list of aspects.

Aspects where both 'in graphic' and 'in list' are disabled are not calculated.

ATTENTION: All settings made here are only saved permanently when 'Save' or 'Save as ...' is tapped. In this way, for example different planets and aspects can be set one after the other and then all can be taken over by 'Save'.

At 'Save as ...' you will be asked for the name of the aspect set. If a name is entered here that does not yet exist, a corresponding new aspect set is saved.

Style of aspect lines

Here the strength of the aspect lines between 'thin', 'medium' and 'thick' can be selected. The setting immediately affects all horoscope drawings. This setting option is useful to display the aspect patterns on the respective device (tablet, smartphone) in the most pleasant way.

Regardless of the basic setting made here, the relative thickness of the aspect lines is determined between 5 = maximum thickness and 1 = minimum thickness according to the following rule.

Percentage accuracy of the orb, where 100% means the aspect is absolutely accurate:

90% - 100 % = Linewidth 5

60% - 89 % = Linewidth 4

40% - 59 % = Linewidth 3

20% - 39 % = Linewidth 2

1% - 19 % = Linewidth 1

The linewidth is not stored in the aspect sets.

GRAPHICS

Lines on Planets

Here the linewidth of the degree lines of the planets can be set:

very thin

thin

medium

thick

very thick

Symbol Colours

Here you can choose any color for the following elements:

Planet Symbols

Symbols for Invert- and Downpoint

Colours of the qualities (Cardinal, Fixed, Mutable)

Colours of the elements (Fire,Earth,Air,Water)

Settings made here only take effect after restarting Astro Mirror.

There is also the possibility to reset everything back to the standard colors.

Symbols in moon node chart

Sets if the zodiac symbols in the moon node chart are shown filled out or only contoured.

Settings made here only take effect after restarting Astro Mirror.

Alternative Symbols

Allows the selection of alternative Symbols for some planets. (At the moment only Lilith.)

Settings made here only take effect after restarting Astro Mirror.

'R' on retrograde planets

This checkbox controls whether the graph shows the letter R next to the symbol for retrograde (retrograde) planets.

In the list of planet positions, the 'R' is always displayed regardless of this setting.

This setting takes effect immediately without restart.

Chiron

Controls whether Chiron is displayed in the horoscope graphic.

This is not set after installation of Astro Mirror.

Chiron is always displayed in the data lists regardless of this setting.

This setting takes effect immediately without restart.

Lilith

Controls whether Lilith is displayed in the horoscope graphic.

This is not set after installation of Astro Mirror.

Lilith is always displayed in the data lists regardless of this setting.

This setting takes effect immediately without restart.

'True' Lilith

Controls whether the 'true' or 'mean' Lilith is used.

If this is not selected, the 'mean' Lilith will be used.

This is set after installation of Astro Mirror.

This setting takes effect immediately without restart.

'True' Node

Controls whether the 'true' or 'mean' moonnode is used.

If this is not selected, the 'mean' moonnode will be used.

This is set after installation of Astro Mirror.

In the Huber school the moonnode is very important and the use of the 'true' moonnode is mandatory.

This setting takes effect immediately without restart.

FIXED STARS / GALACTIC CENTER

A list of the 139 most important fixed stars plus the Galactic Center is displayed here. Above the list there is an input field which can be used to filter the list.

The selected elements are drawn in the graphic with their name. In addition, conjunctions and oppositions to one of the planets in the horoscope are automatically checked. Aspects found are displayed in a separate data list.

This setting takes effect immediately without restart.

Help

FUNCTION	Show help.
DESCRIPTION	Show this help information.

Licensing

SYMBOL	
FUNCTION	Input or show of license key

DESCRIPTION	<p>A license key can be entered here to activate the full version of Astro Mirror.</p> <p>If the license has already been activated, the status is displayed here.</p>
-------------	--

↑ About

SYMBOL	
FUNCTION	Information about the current version of Astro Mirror
DESCRIPTION	<p>Displays technical information about Astro Mirror::</p> <p>Version, date of creation, versions of the databases used. Copyright and Credits.</p>

↑ Functions in the right menu:

↑ API Methods

↑ Basic Chart

After entering new horoscope data or selecting a horoscope from the list of saved horoscopes, the graphic of the basic chart (radix) is always displayed first.

When the device is rotated, the graphic is automatically displayed in portrait or landscape format, depending on the orientation of the device, if this is allowed on the device.

Arrangement and function of the elements on the screen

Top Bar:

 Opens the main menu. This menu can also be opened by swiping inside from the left edge.

 Displays context sensitive help.

 Opens the options menu. This menu can also be opened by swiping

- inside from the right edge.

Graphics Area:

Most of the graphics screen is taken up by the actual horoscope graphic. In portrait mode, these are about the upper 2/3, in landscape mode about the left half.

Below the graphic (to the right of the graphic in landscape mode) a 30° scale of the planet positions can be displayed. This option is only offered if the screen size of the device allows it.

The rest of the lower (landscape right) part of the screen displays the name, date, time, time zone, location with geographic coordinates, as well as the ascendant (AC) and midheaven (MC).

In the upper left corner of the graphic the used house system is displayed. Tapping on this display opens a dialog to change the house system. If a change in the house system is made here, it is permanently assigned to the respective horoscope. When entering new horoscopes, the standard house system defined in the settings will continue to be used. The standard house system always applies when calculating the current horoscope.

In the upper right corner of the graphic the actual aspect factor and the used aspect set is displayed. Taping on this display opens a dialog for aspect settings:

Aspect Set: This setting will be saved for this horoscope. New horoscopes still use the default aspect set.

Linewidth: Select: thin, medium, thick. Change affects all horoscopes globally.

Aspektfactor: Decreases or increases the number of shown aspects. Change affects all horoscopes globally.

Finger gestures control Some helpful finger gestures can be used in the horoscope graphics:

Two fingers zoom: As in most picture galleries, the graphic can be zoomed by pulling it apart with two fingers.

One Finger Move: In the zoomed state, the graphic can be moved with one finger in order to take a closer look at certain points.

Double Tap: The zoom mode can be terminated by quickly tapping the graphic twice.

Swipping: You can switch from the basic chart (radix) to the house horoscope by swiping from right to left, swiping from left to right changes from radix chart to the moon node horoscope.

Right options menu: In the options menu on the right-hand side, the following points can be selected for the radix horoscope:

API Methods: This menu point provides access to all functions of the Huber

School (API):

[House Chart](#) (also available by swipe to the left)

[Moonnode Chart](#) (also available by swipe to the right)

[Age Points](#) (Show the age points for a certain date in the natal chart including aspects)

[Singleclick](#)

[Integration](#)

[Karmaclick](#)

[Special Methods](#) (Aspect Patterns, Age Point Biography, Age Point Progression, Dynamic Counting, Dynamic Quadrant)

[Data Lists](#) Positions of planets in zodiac and house, cusps and size of houses, aspects of planets, aspects statistics, aspects to fixed stars

[Comment](#) Displays remarks saved for this horoscope or allows you to enter or change remarks

[Pre-natal Moons](#) Date of the last new and full moon before birth date is displayed. Tapping on one of these dates displays the corresponding horoscope

[Post-natal Moons](#) Date of the first new and full moon after birth date is displayed. Tapping on one of these dates displays the corresponding horoscope

[Return Chart](#) Shows selection mask to search and display returns of any planet including moon node in the past and future

[Change Date/Time](#) Date and / or time of the horoscope can be changed via an adjustment dialog

[Show/Hide](#) Opens an adjustment dialog with which certain parts of the horoscope graphic can be shown or hidden: Goodwill Aspects, aspects to spiritual planets, aspects to the moon node, age point years, invert point and low point, 30° scale, no planets, only aspect pattern)

[Create PDF File](#) Allows you to create a PDF file of the displayed horoscope and, if desired, to send the file by e-mail.

↑ Special Methods

When the device is rotated, the screens are automatically displayed in portrait or landscape format, depending on the orientation of the device, if this is allowed on the device.

↑ Aspect Patterns

Arrangement and function of the elements on the screen

Top Bar:

 Displays context sensitive help.

List:

A number of aspect patterns are defined in the Huber School.
There are aspect triangles, aspect rectangles and some special figures.

Which aspect patterns are found depends on:

- 1. the current aspect set
- 2. the option in the settings whether Goodwill aspects are considered
- 3. the option in the settings whether Chiron and/or Lilith are displayed

The aspect patterns found in the respective horoscope are listed one below the other.

The patterns are displayed in ascending order according to the mean orb.
The mean orb is calculated according to the following rule:
Sum of all orbs of the aspects of the pattern / number of aspects.

There are one-sided aspects that are drawn dashed on one side. This one-sided dashed lines are not visible in the list of aspect patterns for technical reasons. However, the number of one-sided aspects of a pattern is automatically detected. If more than 2 aspects of the pattern are one-sided, the pattern is considered 'latent'. This is displayed in the list, along with the aspects affected. The planet on whose side the one-sidedness is present is highlighted in gray.

Tapping an aspect pattern displays the page number where the pattern is described in the book:

Aspect Pattern Astrology

Age Point Biography

Arrangement and function of the elements on the screen

Top Bar:

-  Opens the options menu.

In this menu there are the points:

Previous house

Flip back one house in the age point biography.

Next house

Flip forward one house in the age point biography.

Select house

Opens a selection window to jump directly to the Age Point Biography for a specific house.

Years > 72

Turns on or off the mode for displaying the years after the 72nd birthday.

Help

Open this help.

Graphics Area:

Finger gestures control Some helpful finger gestures can be used in the age point biography graphics:

*Two fingers zoom:*As in most picture galleries, the graphic can be zoomed by pulling it apart with two fingers.

*One Finger Move:*In the zoomed state, the graphic can be moved with one finger in order to take a closer look at certain points.

*Double Tap:*The zoom mode can be terminated by quickly tapping the graphic twice.

The age point of the Huber School starts with the birth on the ascendant and moves in the order of the houses through each house in 6 years.

The age point biography is a graphic representation of the aspects that the age point forms in a particular house.

The representation of the age point biography matrix is basically always in landscape format.

If the device is in portrait mode, the matrix is adjusted so that its entire width is visible by swiping to the left and right.

If the device is in landscape mode, the matrix fills in the entire available screen. The graphic can be zoomed with two finger gestures.

The first time you call up the age point biography, the house where the age point of the radix is currently located is automatically displayed.

In the matrix, a vertical red line is drawn at the current date and the matrix will automatically scroll to bring this line if possible in the middle of the screen.

Age Point Progression

Arrangement and function of the elements on the screen

Top Bar:

 Opens the options menu.

In this menu there are the points:

Filter data

Opens a dialog in which the age progression list can be filtered or unfiltered.

Help

Open this help.

List:

The age point of the Huber School starts with the birth on the ascendant and moves in the order of the houses through each house in 6 years.

In the list the following events during the progression of the age point are shown:

House Cusps

Aspects to Planets

Invert Point (IP)

Low Point (LP)

Midpoints (/)

Entry into a new sign (Ingress IN)

In the case of the aspects to the planets, two different arrows indicate which part of the aspect cycle the aspect belongs to:

 increasing (from conjunction to opposition)

 decreasing (opposition to conjunction)

Dynamic Counting

Graphics Area:

Finger gestures control Some helpful finger gestures can be used in the dynamic counting screen:

*Two fingers zoom:*As in most picture galleries, the screen can be zoomed by pulling it apart with two fingers.

*One Finger Move:*In the zoomed state, the screen can be moved with one finger in order to take a closer look at certain points.

*Double Tap:*The zoom mode can be terminated by quickly tapping the screen twice.

Dynamic Quadrant

Arrangement and function of the elements on the screen

Top Bar:

 Opens the options menu.

In this menu there are the points:

Planets with motivation
Turns on or off the motivation display for the planet icons.

The colors used are:

RED: Cardinal motivation

BLUE: Fix motivation

GREEN: Variable motivation

1. Each planet symbol is drawn in the color of the motivation assigned to it.

Sun	cardinal
Moon	mutable

Saturn	fixed
Mercury	mutable
Venus	fixed
Mars	cardinal
Jupiter	mutable
Uranus	fixed
Neptune	mutable
Pluto	cardinal
Moonnode	neutral
Chiron	
Lilith	

The moonnode as well as Chiron and Lilith are drawn in black.

2. The background of the planet symbol is drawn in the color of the motivation of the sign it is in.

Aries	cardinal
Taurus	fixed
Gemini	mutable
Cancer	cardinal
Leo	fixed
Virgin	mutable
Libra	cardinal
Scorpio	fixed
Sagittarius	mutable
Capricorn	cardinal
Aquarius	fixed
Pisces	mutable

3. The outer frame of the planet symbol is drawn in the color of the motivation of the house in which it stands.

1	cardinal
2	fixed
3	mutable
4	cardinal
5	fixed
6	mutable
7	cardinal
8	fixed
9	mutable
10	cardinal
11	fixed
12	mutable

Simplified labeling
Toggles between detailed or simplified labeling in the title of the phases.

Help
Open this help.

Graphics Area:

The Dynamic Quadrant is a graphic representation of the affective reflex structure of the horoscope.

The representation of the dynamic quadrant matrix is basically always in landscape format.

If the device is in portrait mode, the matrix is adjusted so that its entire width is visible by swiping to the left and right.

If the device is in landscape mode, the matrix fills in the entire available screen. The graphic can also be enlarged with a two-finger zoom.

↑ Age Points

Show the position of the natal and moon node age point on a specific date (optionally also with aspects) in the graphic.

↑ Single Click Chart

Show the Single Click chart for the current client.

The Single Click horoscope shows only the primary aspects conjunction and opposition between radix and moon node horoscope.

↑ Integration Chart

Show the Integration Click chart for the current client.

The integration horoscope shows all aspects (conjunction, semi-sextile, sextile, square, trine, quincunx and opposition) of the main planets (sun, moon, saturn) and the moon nodes between radix and moon node horoscope.

↑ Karma Click Chart

Show the Karma Click chart for the current client.

In the Karma Click chart the primary aspects are shown with an allowed orb of 100%, all other aspects with and orb of 60% between radix and moon node horoscope.

↑ Compare with

Compare with other horoscope

The list of stored horoscopes is displayed and a horoscope can be selected for comparison.
After selection, the synastry chart is immediately calculated and displayed.

Compare with actual horoscope

The synastry chart between the horoscope and the actual horoscope is immediately calculated and displayed.

Synastry

In a horoscope comparison according to the method of synastry, the planets of both partners are entered into a horoscope chart and all aspects of the planets of the first partner to the planets of the second partner are drawn in. It is calculated with halved orbis.

Arrangement and function of the elements on the screen

Upper bar:

 Opens the main menu. This menu can also be opened by swiping inside from the left edge.

 Displays context sensitive help.

 Opens the options menu. This menu can also be opened by swiping inside from the right edge.

Graphics Area:

Most of the graphics screen is taken up by the actual horoscope graphic. In portrait mode, these are about the upper 2/3, in landscape mode about the left half.

The rest of the lower (landscape right) part of the screen displays name, date, time, timezone, place with geographical coordinates of the two compared horoscopes is displayed. On the left in red the data for the original horoscope, on the right in blue for the comparison horoscope. In a synastry horoscope, the planets of the two horoscopes are also shown in the respective colors red or blue.

In the upper right corner of the graphic the actual aspect factor and the used aspect set is displayed. Taping on this display opens a dialog for aspect settings:

Aspect Set: This setting will be saved for this horoscope. New horoscopes still use the default aspect set.

Linewidth: Select: thin, medium, thick. Change affects all horoscopes globally.

Aspektfactor: Decreases or increases the number of shown aspects. Change affects all horoscopes globally.

Finger gestures control: Some helpful finger gestures can be used in the horoscope graphics:

*Two fingers zoom:*As in most picture galleries, the graphic can be zoomed by pulling it apart with two fingers.

*One Finger Move:*In the zoomed state, the graphic can be moved with one finger in order to take a closer look at certain points.

*Double Tap:*The zoom mode can be terminated by quickly tapping the graphic twice.

Right options menu: In the options menu on the right-hand side, the following points can be selected for the compare horoscope:

Compare Method this menu point allows access to the various horoscope comparison methods, namely:

[Synastry](#)

[Composite Chart](#)

[Davison Relationship Chart](#)

Data Lists Positions of planets in zodiac and house, cusps and size of houses, aspects of planets, aspects statistics, aspects to fixed stars

Show/Hide Opens an adjustment dialog with which certain parts of the horoscope graphic can be shown or hidden: Goodwill Aspects, aspects to spiritual planets, aspects to the moon node, 30° scale, no planets, only aspect pattern)

Create PDF File Allows you to create a PDF file of the displayed horoscope and, if desired, to send the file by e-mail.

In a horoscope comparison using the Composite Chart method, a midpoint or halfpoint is calculated for the same horoscope factors (Sun of partner A and Sun of partner B, etc.). This then gives the respective factor in the composite chart. The same applies to the house cusps.

Arrangement and function of the elements on the screen

Davison Relationship Chart

A horoscope calculated by combining the birth data of two individuals.

The date and time can be determined by calculating the day that lies exactly between the natal charts of those involved. The same principle is also applied to the times of birth. If the individuals involved have different places of birth a combined "place of birth" is calculated by taking the average values of latitude and longitude.

Data

When the device is rotated, the screens are automatically displayed in portrait or landscape format, depending on the orientation of the device, if this is allowed on the device.

Show the data sheets of the current client.

The data sheets contain different information depending on the currently shown horoscope.

Basic Chart: positions of planets in zodiac and house, cusps and size of houses, aspects of planets, statistic (of aspects), aspects to fixed stars

House Chart: positions of planets in zodiac and house, aspects of planets

Moonnode Chart: positions of planets in zodiac and house, aspects of planets

Return Chart: positions of planets in zodiac and house, cusps and size of houses, aspects of planets, statistic (of aspects), aspects to fixed stars

Synastry: positions of planets in zodiac and house, aspects of planets

Transits

Show transits to the current horoscope.

After the selection of a date and time, the transits for that horoscope at that time will be displayed.

Comment

Show comment of the current client.

Displays remarks saved for this horoscope or allows you to enter or change remarks.

↑ Pre-/Post-natal Moons

This menu item is only visible when a birth chart is displayed.

Shows the date of the last new and full moon before birth date and the date of the next new and full moon after birth date.

Tapping on one of these dates displays the corresponding horoscope and saves it in the list of horoscopes.

↑ Moonphases

This menu item is only visible when a current horoscope for 'Here and Now' is displayed.

Shows the date of the last new and full moon before the actual date and the date of the next new and full moon after the actual date.

Tapping on one of these dates displays the corresponding horoscope and saves it in the list of horoscopes.

↑ Return Chart

When the device is rotated, the graphic is automatically displayed in portrait or landscape format, depending on the orientation of the device, if this is allowed on the device.

Arrangement and function of the elements on the screen

Top Bar:

-  Opens the main menu. This menu can also be opened by swiping inside from the left edge.
-  Displays context sensitive help.
-  Opens the options menu. This menu can also be opened by swiping inside from the right edge.

Graphics Area:

Most of the graphics screen is taken up by the actual horoscope graphic. In portrait mode, these are about the upper 2/3, in landscape mode about the left half.

Below the graphic (to the right of the graphic in landscape mode) a 30° scale of the planet positions can be displayed. This option is only offered if the screen size of the device allows it.

The rest of the lower (landscape right) part of the screen displays the name, date, time, time zone, location with geographic coordinates, as well as the ascendant (AC) and midheaven (MC).

In the upper left corner of the graphic the used house system is displayed. Tapping on this display opens a dialog to change the house system. If a change in the house system is made here, it is permanently assigned to the respective horoscope. When entering new horoscopes, the standard house system defined in the settings will continue to be used. The standard house system always applies when calculating the current horoscope.

In the upper right corner of the graphic the actual aspect factor and the used aspect set is displayed. Taping on this display opens a dialog for aspect settings:

Aspect Set: This setting will be saved for this horoscope. New horoscopes still use the default aspect set.

Linewidth: Select: thin, medium, thick. Change affects all horoscopes globally.

Aspektfactor: Decreases or increases the number of shown aspects. Change affects all horoscopes globally.

Finger gestures control Some helpful finger gestures can be used in the horoscope graphics:

Two fingers zoom: As in most picture galleries, the graphic can be zoomed by pulling it apart with two fingers.

One Finger Move: In the zoomed state, the graphic can be moved with one finger in order to take a closer look at certain points.

Double Tap: The zoom mode can be terminated by quickly tapping the graphic

twice.

Right options menu: In the options menu on the right-hand side, the following points can be selected for the radix horoscope:

API Methods: This menu point provides access to functions of the Huber School (API):

Special Methods (on return horoscopes only Dynamic Counting, Dynamic Quadrant)

Data Lists Positions of planets in zodiac and house, cusps and size of houses, aspects of planets, aspects statistics, aspects to fixed stars

Comment Displays remarks saved for this horoscope or allows you to enter or change remarks

Other Return Chart Opens return chart input mask to select a different return

Show/Hide Opens an adjustment dialog with which certain parts of the horoscope graphic can be shown or hidden: Goodwill Aspects, aspects to spiritual planets, aspects to the moon node, age point years, invert point and low point, 30° scale, no planets, only aspect pattern)

Create PDF File Allows you to create a PDF file of the displayed horoscope and, if desired, to send the file by e-mail.

Change Date/Time

Opens a dialog to change date and / or time of the horoscope.

In the upper part of the dialog you can select a new date or time.

On bottom of the dialog there are three icons:

 Clicking this icon recalculates the horoscope with the set date and time and redraws the chart. This new chart is not saved permanently.

 Clicking this icon recalculates the horoscope with the set date and time and redraws the chart. This new chart is saved and the dialog is closed.

 Clicking this icon closes the dialog and cancels all temporary data. The original date and time will be used again.

Tapping somewhere outside the dialog closes it and cancels all new data.

Show / Hide

Opens an adjustment dialog with which certain parts of the horoscope graphic can be shown or hidden:

remains until restart

- goodwill aspects

Switches goodwill aspects on or off.

Goodwill aspects are aspects whose accuracy differs from the allowed value by a maximum of 10% for both planets.

They are drawn with a full length dotted line.

In the data lists, goodwill aspects are always listed with the letter G behind the orbis value.

Only if this menu item is framed in red, goodwill aspects exist in the actual horoscope.

DEFAULT: OFF

- aspects to spiritual planets

Switches aspects to the spiritual planets (Uranus, Neptune, Pluto) on or off.

DEFAULT: ON

- aspects to Moonnode

Switches aspects to the moon node on or off.

DEFAULT: ON

- AP years

Switches year numbers of the age point on or off.

DEFAULT: ON

- IP / LP

Switches the invert and low point symbols on or off.

DEFAULT: ON

- no planets

Switches the planet symbols on or off.

DEFAULT: OFF

- only aspect pattern

Switches everything except the aspect pattern off.

DEFAULT: OFF

remains permanent

- 30° scale

Switches a 30° scale below the horoscope graphic (to the right in landscape) on or off.

DEFAULT: OFF (The position of this switch remains permanently saved even after restarting the application.)

- Fixed Stars

Switches the display of fixed stars on or off.

DEFAULT: OFF (The position of this switch remains permanently saved even after restarting the application.)

- 2nd planets out

*This switch is only displayed for horoscope comparisons or transits.
If switched on, the planets of the comparison horoscope or the transit planets are shown outside the zodiac.
DEFAULT: ON (The position of this switch remains permanently saved even after restarting the application.)*

- **only slow transits**

This switch is only displayed for transits.

If switched on, only aspects to transiting planets from Jupiter onwards are shown.

DEFAULT: ON (The position of this switch remains permanently saved even after restarting the application.)

Create PDF

Allows you to create a PDF file of the displayed horoscope and, if desired, to send the file by e-mail.

Astro Clock on/off

This menu item is only visible when a current horoscope for 'Here and Now' is displayed.

This starts the Astro Clock function, which means that the displayed horoscope chart is automatically updated every 60 seconds. The upper part of the display will show 'Astro Clock running'.

Selecting the 'Astro Clock On/Off' menu item again or exiting the current chart switches the Astro Clock mode off again.

CAUTION: If the option 'No hibernation at Astro Clock' has been activated in the settings, the screen will no longer be dimmed as long as the Astro Clock function is running ! This causes increased battery consumption !

Save

This menu item is only visible when a current horoscope for 'Here and Now' is displayed.

The displayed current horoscope can be saved under any name in the list of horoscopes.

A dialog is displayed for specifying the name. A name formed from date, time and place is suggested, but can be overwritten or modified.

The entries in the 'Addition' field are appended to the name in the chart list.

A comment can also be entered.
